

# De-Clutter Your e-Clutter

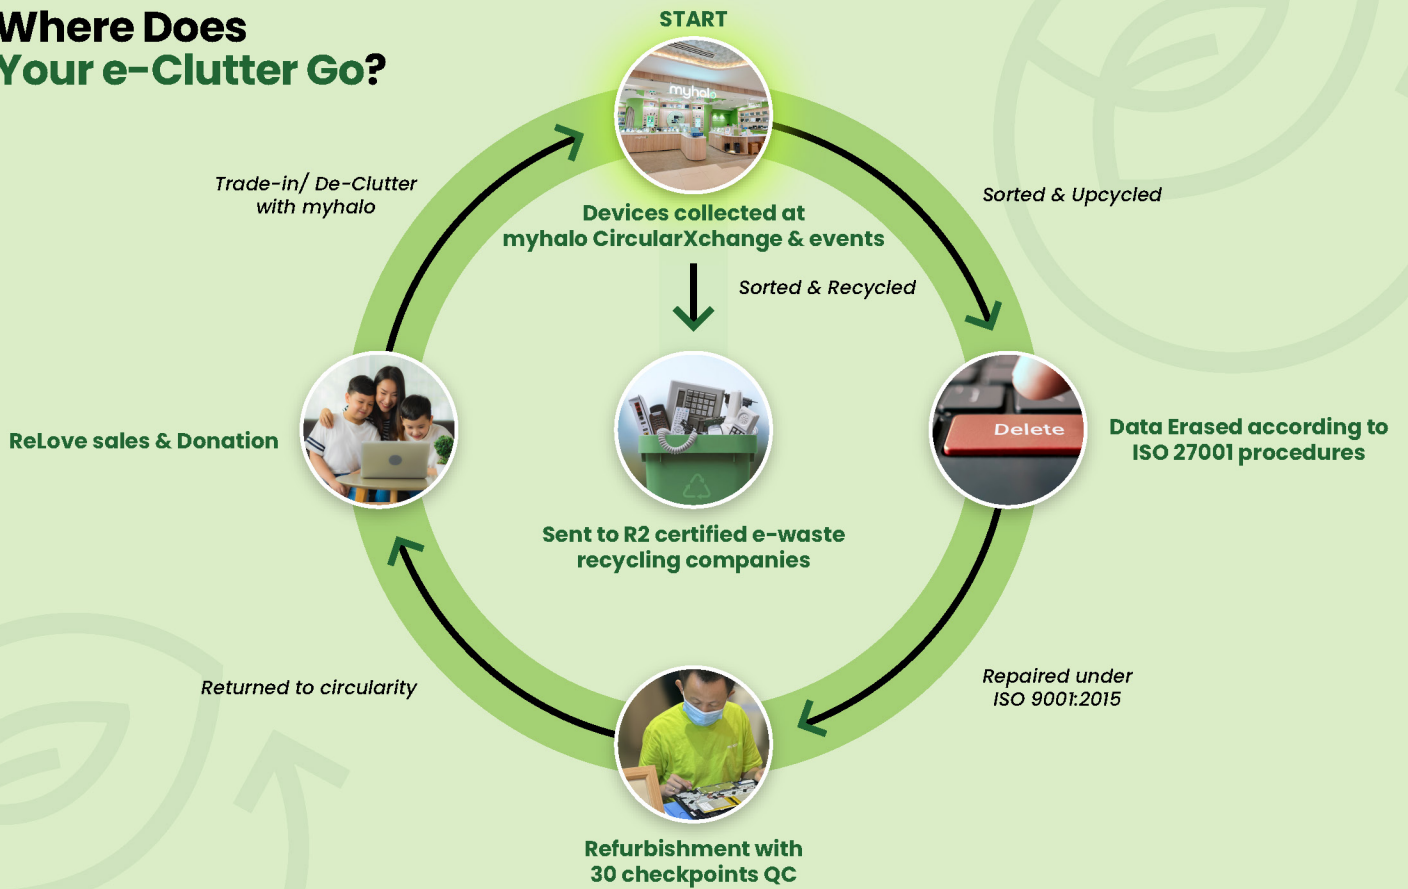

Our surveys reveal a startling fact: working Singaporean adults have an average of 3.3 inactive small electronic devices at home. Many of these devices are partially functional or non-functional, often containing important data.

Hence, myhalo came up with the 'De-Clutter Your e-Clutter' initiative to encourage the public to responsibly de-clutter old and not-in-use devices.

## What can you De-Clutter and where does your e-clutter go?

## Where Does Your e-Clutter Go?

## Why De-Clutter Your e-Clutter?

We collect old/faulty devices, safely erase data in the device, and finally donate them to the needy or send the unusable devices to R2-certified e-waste recycling companies.

With De-Clutter Your e-Clutter, you can de-clutter your space knowing that your old devices are being de-cluttered responsibly and safely.

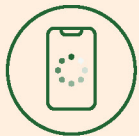

# RescueAdvise

We believe that with the right guidance and expertise, many tech problems can be resolved without costly replacements.

That's where myhalo's **RescueAdvise** Program comes in – a new **free service** to diagnose your device issues and get expert advice on **extending the lifespan of your gadgets**.

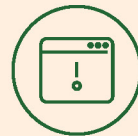

## What issues can we help you with?

Running slow

Experiencing battery drainage

Facing software glitches

Unable to turn on

## Why RescueAdvise?

To reduce the amount of e-waste generated and return as many devices to the circular economy as possible, it's important that before we resort to throwing away any device that begins to underperform, we do our best to tackle the root cause of the problem.

With RescueAdvise, we give devices a second chance at life by extending their lifespan, reducing the amount of e-waste accumulating in our landfills.
